# YOUR TRUSTED CYBER-SECURITY PARTNER

Snapsec is a leading cybersecurity company that provides a wide range of **services** and **solutions** to help businesses of all sizes protect their digital assets and mitigate security risks. We are committed to providing our clients with the highest quality cybersecurity services and solutions, and have earned the trust of **70+ companies** worldwide.

# ABOUT THE BRAND

YOUR TRUSTED CYBER  
SECURITY PARTNER

Snapsec is a trusted cybersecurity company that **has helped 70+ world-class companies** protect their digital assets and mitigate security risks. We offer a wide range of cybersecurity services and products to help companies of all sizes manage their security posture continuously and proactively.

# CORE VALUES

## QUALITY

---

Our relentless focus on excellence drives impact-driven security assessments. We help companies identify risks that matter most to their business, so they can focus on what actually matter most to them

## MANAGEMENT

---

We understand that without proper management, security operations can stagnate. At Snapsec, we are dedicated to crafting solutions and processes that establish robust security management for companies.

## CONTINUITY

---

We firmly believe in establishing a continuous process of identifying and addressing security issues, with the dedicated assistance of our expert team. This approach ensures that your organization maintains robust security over time.

# OUR SERVICES

1 **Vulnerability assessment and penetration testing (VAPT)**

2 **Mobile application penetration testing**

3 **Infrastructure penetration testing**

4 **Vulnerability scanning**

5 **API security testing**

6 **Continuous security testing**

7 **Code review**

8 **Cloud security testing**

# SECURITY METHODOLOGY

6

7

8

9

10

## RECON

In the Recon Phase, SnapSec's team gathers data about your system, identifying different entry points. We use tools to analyze architecture, networks, and services, laying the foundation for further testing.

## CHECK LIST APPROACH

In the Checklist Approach, SnapSec's team employs various security checklists from experts and organizations to assess your system for known vulnerabilities. We systematically test against thousands of recognized vulnerabilities.

## DYNAMIC SECURITY TESTING

In Dynamic Security Testing, SnapSec engages with your system, observing its behavior and structure. We tailor custom attacks specifically designed for your system based on our analysis, providing precise security testing.

## AUTOMATED SECURITY TESTING

In the Automated Security Testing phase, SnapSec employs various open-source and commercial scanners to automatically assess your system for vulnerabilities. This method allows us to swiftly and comprehensively identify potential security weaknesses.

## ATTACKING ACCESS CONTROL MODELS

In the Attacking Access Control Models phase, SnapSec employs their own comprehensive testing methodology to uncover permission bugs, privilege escalation, and broken access control issues within the system. [Read full Methodology here.](#)

## COMPONENT SECURITY TESTING

In the Component Security Testing phase, SnapSec individually assesses system components such as Authentication, Authorization, Session Management, Rate Limiting, and other security controls. This focused approach ensures the integrity of each element's security.

## REPORT WRITING

In the Report Writing phase, SnapSec compiles vulnerability reports, prioritizes them, and adds them to the Vulnerability Management System. Clients receive access to these detailed reports, including titles, steps to reproduce, and recommended fixes for each vulnerability.

## REMEDIATION

In the Remediation phase, SnapSec collaborates with clients to address each vulnerability individually, offering expert consultation and guidance for mitigation and resolution. We work systematically to enhance your system's security.

## RETEST

In the Retest phase, SnapSec validates the effectiveness of the fixes applied to address vulnerabilities. We ensure that all resolved issues are functioning correctly and cannot be bypassed, enhancing the system's overall security.

## RETEST REPORT

In the Retest Report phase, SnapSec provides a new report to the customer. This report highlights the results of retesting, including any identified bypasses and the effectiveness of the implemented fixes, ensuring transparency and clarity about the system's security status.

# SNAPSEC SUITE

Our suite brings together six powerful products into one centralized platform, providing a unified approach to securing your digital environment. These products include Attack Surface Management, Vulnerability Management, Phishing Simulation, Secret Management, VDP Management, and Employee Training Management.

By centralizing these tools, we streamline your cybersecurity operations, making it easier to monitor and manage all aspects of your security. Additionally, our suite achieves advanced correlation of the data collected, offering deeper insights and a more robust defense against threats.

## CORE VALUES OF SOLUTION

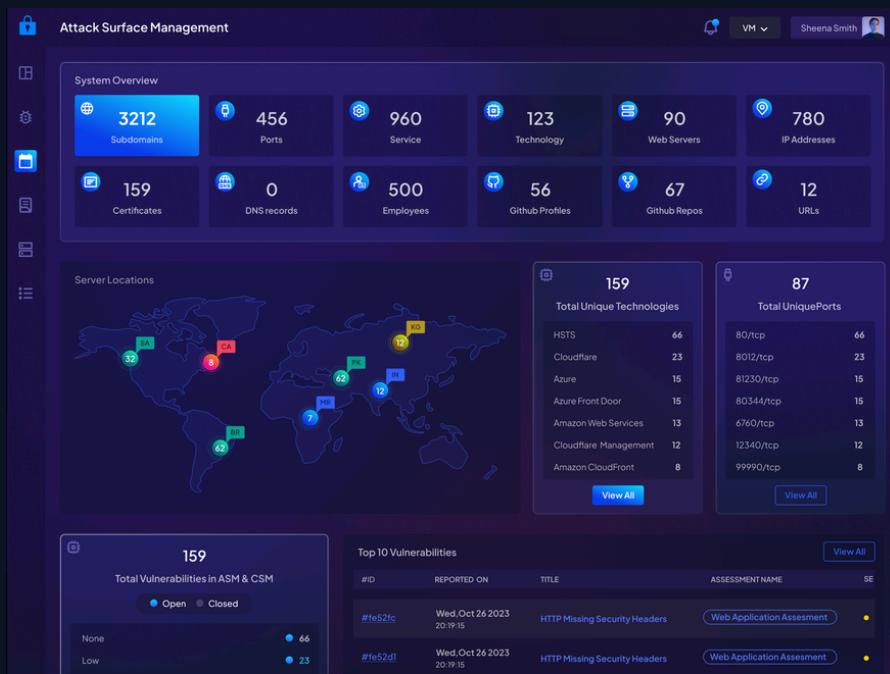

### Centralization

Our platform unifies multiple cybersecurity tools into a single, centralized solution for easier management.

### Co-Relation

We correlate data from various tools to provide deeper insights and more effective threat detection.

## OUR PRODUCTS

# ATTACK SURFACE MANAGEMENT

ASM is a valuable solution for any organisation that wants to improve its security posture and protect itself from cyber threats. By continuously identifying and remediating vulnerabilities, ASM can help organisations to reduce their attack surface and prevent attackers from exploiting vulnerabilities to gain access to their systems and data.

## KEY FEATURES

### Key Benefits of Our Attack Surface Management

#### Continuous Vulnerability Scanning

Regular scans to identify and address security weaknesses across your digital assets, ensuring your infrastructure remains secure against potential threats.

#### Data Breach Protection

Proactive Scanning against online data-beaches to safeguard sensitive information, minimizing the risk of data breaches.

#### Enhanced Visibility

Real-time monitoring and insights into your exposed infrastructure, helping you quickly identify and mitigate risks.

#### AI-Powered Report Writing

Automated generation of detailed security reports using artificial intelligence, delivering actionable insights and saving time on manual documentation.

#### Comprehensive Asset Catalog

An organized inventory of all digital assets, providing a clear overview and enabling efficient management and security of your resources.

#### 360 Approach

Run comprehensive scans identify issues across domains, personnel, data breaches, leaks, and more, ensuring thorough protection from all angles.

## OUR PRODUCTS

# VULNERABILITY MANAGEMENT

SnapSec's Continuous Security Management System provides a simple and intuitive solution for effective vulnerability management. With our platform, you can easily identify, track, and resolve vulnerabilities within your organization's digital infrastructure.

## KEY BENEFITS

Key Benefits of Our Vulnerability management

<b>Centralized Screen for All Reports</b>	Provides a unified dashboard for easy access and management of all vulnerability reports generated from multiple assessments	<b>Customized PDF Report Pентest Generation</b>	Enables you to create tailored PDF reports at any time for comprehensive documentation and sharing.
<b>Automatic Prioritization</b>	Automatically classification of vulnerabilities based on risk, allowing you to focus on the most critical threats first.	<b>Team Collaboration</b>	Facilitates collaboration by inviting your entire team, assign tasks, track blockers, add comment for coordination.
<b>Overview of All Assessments</b>	Offers a holistic view of all your security assessments, helping you track progress and identify areas needing attention.	<b>Remediation Tracking</b>	Monitors the progress of vulnerability remediation efforts, ensuring timely resolution of identified issues.

## OUR PRODUCTS

The screenshot shows a dark-themed LMS interface. At the top, there's a navigation bar with icons for 'Code base', 'ASW', and a user profile for 'Sheena Smith'. Below the navigation is a course card for 'Social Engineering Attacks'. The card includes a star rating of 4.5 out of 5 from 1765125 employees, created by 'Imran Paray' last updated on 'Imran Paray', in English, with a duration of 24 Minutes. Two buttons at the bottom are 'Enroll' and 'Take Assessment'. To the right of the card is a circular graphic of a padlock inside a network of lines. Below the card are four smaller thumbnail images: 'Phishing Simulation Cyber Attacks', 'SSL Security and API Config', 'Imran the Sasta Hacker', and 'Cyber Business Boom in India', each with a brief description.

# EMPLOYEE TRAINING MANAGEMENT

Our employee training management solution offers a comprehensive platform for security training. It provides a centralized view of employees' security scores, allowing administrators to track progress and identify areas for improvement easily. With customizable course assignment capabilities, admins can assign relevant security courses to employees based on their roles and responsibilities. This ensures that employees receive targeted training to enhance their cybersecurity awareness and skills.

## KEY BENEFITS

Key Benefits of Our employee training management

### Access to the Latest Cybersecurity Courses

Employees can stay updated with the newest cybersecurity practices through regularly updated courses.

### Employee Leaderboard

Tracks and displays employee scores, fostering a competitive and engaging learning environment.

### Auto Course Assignment

Automatically assigns relevant courses to employees compromised in phishing simulations or if their email is leaked online.

### Assessment Tests

Provides comprehensive assessments to evaluate employee understanding and retention of course material.

### Manual Course Assignment

Allows administrators to assign specific courses to employees based on their roles or needs.

### Admin Progress Tracking

Enables administrators to monitor and track the training progress of all employees.

## OUR PRODUCTS

The screenshot shows the SnapSec Phishing Simulator interface. At the top, there's a navigation bar with icons for Home, Products, Services, Support, and Contact. The main header reads "Phishing Simulator" and "No Human Errors with the Phishing Simulator". Below the header, a sub-header says "Deploy simulated phishing to educate users, mimicking real-world scenarios for staff readiness, enhancing awareness about online security threats in organizations." There are three main sections: "Empowering Protection Everywhere.", "Interactive Phishing simulation", and "Pre-built Templates". Each section has a brief description and a button: "Create A Campaign", "Create A Contact", and "Make Your Plan". Below these sections, there's a table titled "300 Total Contacts" with three rows of data: Imran Paray, Faheem Hussain, and Mubashir Ahmed, each with an "Edit" and "Delete" icon. A "View All" button is at the top right of the contacts table. Below the contacts is a section titled "Recent Campaigns" with three entries: "#1 Attack on titan successful", "#2 Software Upload Failed", and "#3 MubbPorrauy died", each with an "Email" and "Success" status indicator and a timestamp.

## PHISHING SIMULATOR

SnapSec Phishing Simulator is a sophisticated tool designed to help organizations assess and improve their resilience against phishing attacks. It offers a range of features such as creating realistic phishing email templates, launching simulated phishing campaigns, and tracking employee responses. With SnapSec Phishing Simulator, organizations can identify vulnerabilities in their workforce's awareness and behavior related to phishing attacks. This tool allows for targeted training interventions, helping employees recognize and avoid falling victim to real phishing threats, ultimately enhancing the overall cybersecurity posture of the organization.

## KEY BENEFITS

### Key Benefits of Our Phishing Simulator System

#### Real-World Training

Provides employees with hands-on experience in identifying and responding to phishing attempts, enhancing their awareness and skills.

#### Behavioral Insights

Tracks and analyzes employee responses to phishing simulations, providing valuable insights into overall security awareness and areas for improvement.

#### Pre Build Phishing Templates

Pre-built SaaS templates not only enhance phishing simulations but also make them more realistic.

#### Phishing Attempt Reporting Portal

A dedicated portal where employees can report suspected phishing emails to admins, who can then review and mark these emails as either phishing or safe.

#### Contact Categorization

Customized phishing campaigns target departments and roles effectively, improving training relevance and impact.

#### Training Portal Integration

Automatically assigns courses based on user activity, streamlining the learning process and ensuring relevant content delivery.

## OUR PRODUCTS

The screenshot shows a dark-themed dashboard titled "Code base". On the left is a sidebar with icons for file operations like lock, code editor, and database. The main area displays eight user profiles in a grid. Each profile card includes a user photo, name, GitHub Repos count (e.g., 1235, 123, 0, 5565), and Leaks count (e.g., 15, 0, 0, 45). A search bar at the top right contains placeholder text "Write a short statement about the features of this page." and a "Search" button. A blue button labeled "+ Import Github Profiles" is also present.

## SECRET SCANNER

SnapSec Phishing Simulator is a sophisticated tool designed to help organizations assess and improve their resilience against phishing attacks. It offers a range of features such as creating realistic phishing email templates, launching simulated phishing campaigns, and tracking employee responses. With SnapSec Phishing Simulator, organizations can identify vulnerabilities in their workforce's awareness and behavior related to phishing attacks. This tool allows for targeted training interventions, helping employees recognize and avoid falling victim to real phishing threats, ultimately enhancing the overall cybersecurity posture of the organization.

## KEY BENEFITS

Key Benefits of Our Secret SCanner

### Extensive Token Scanning

Employs advanced algorithms to scan for over 4000 types of secret tokens, ensuring thorough detection of potential security breaches.

### Comprehensive Integration

Seamlessly integrates with over 300 SaaS platforms including GitHub, Slack, and more, providing extensive coverage for detecting secret leaks.

### Centralized Dashboard

Presents identified leaks on a centralized dashboard, providing clear visibility and easy management of security risks.

### AI-Powered Reporting

Automatically generates detailed reports for using artificial intelligence

### Integration with Vulnerability Management

Integrates with our vulnerability management tool, enabling seamless transfer of findings for prioritized remediation.

### Scheduling and Quick Scans

Offers scheduling options for regular scans and quick scan capabilities.

## OUR PRODUCTS

## VULNERABILITY DISCLOSURE PROGRAM MANAGEMENT

Our solution is a comprehensive Vulnerability Disclosure Program Management platform. It offers structured guidelines and channels for external parties to report potential security vulnerabilities. With intuitive reporting mechanisms and clear communication channels, it ensures that vulnerabilities are efficiently directed to the appropriate teams for prompt resolution. By facilitating smooth communication and collaboration between finders and internal teams, our solution helps organizations effectively manage and mitigate security risks identified by external sources.

## KEY BENEFITS

### Key Benefits of Our Vulnerability Disclosure Program Management

#### Policy Definer

Customizable policies for defining scope, assets, rewards, and more, ensuring clear and consistent guidelines for reporting and managing vulnerabilities.

#### Streamlined Communication

Directly communicate from platform with individuals who submit bugs via email.

#### Leaderboard for Reporters

Customised company leaderboard which motivates and recognises external parties by ranking their contributions.

#### Efficient Triage and Prioritization

With structured reporting mechanisms, our solution helps organizations prioritize and address vulnerabilities based on their severity and impact.

#### Improved Collaboration

By fostering collaboration between finders and internal teams, our solution promotes a proactive approach to vulnerability management.

#### Community Engagement

We actively engage with the bug bounty community and can attract researchers to your program based on your specific needs.

# WHY CHOOSE SNAPSEC

---

## IMPACT-FOCUSED SECURITY APPROACH

Snapsec employs an impact-driven security assessment methodology. We focus on identifying and reporting issues that are crucial to your online security, minimizing noise and maximizing value. We prioritize what matters most to protect your business effectively.

---

## COMPETITIVE PRICING

Our pricing is highly competitive in the market. We offer top-quality security services at budget-friendly rates, ensuring that you receive exceptional value for your investment.

---

## COMPLIMENTARY SOLUTIONS AND CONSULTATION

Snapsec doesn't just identify vulnerabilities; we help you mitigate them. We provide free consultations to guide you through the process of strengthening your security posture. Additionally, our clients gain free access to our vulnerability management tools to streamline their security efforts further.

---

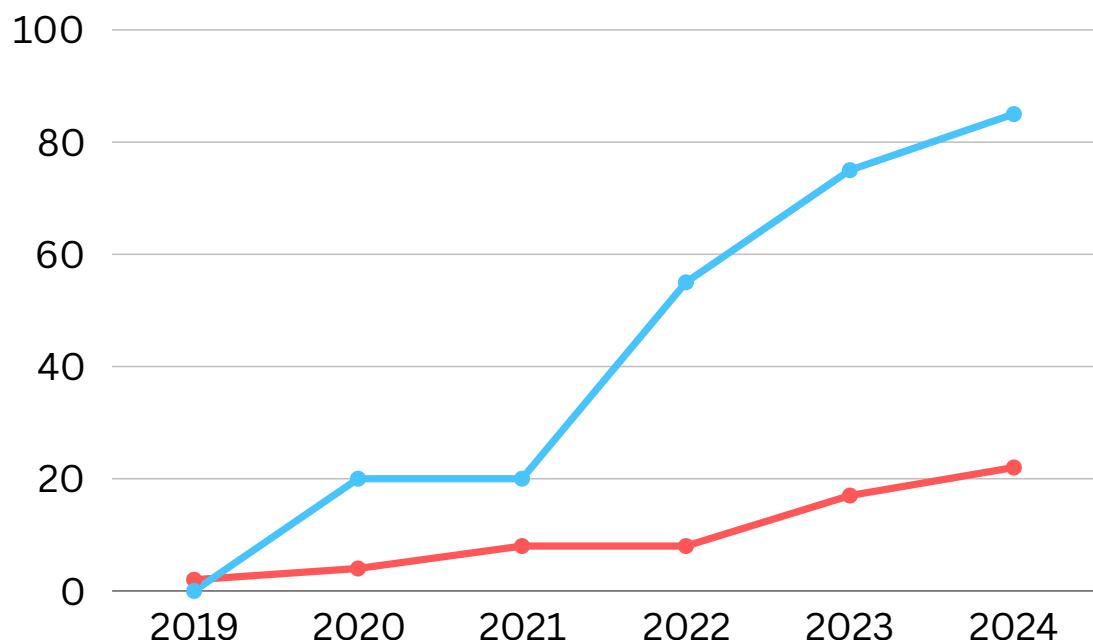

## GOING BEYOND TRADITIONAL SECURITY TESTING

Our unique testing methodology goes beyond traditional bug classes. We invest significant time in understanding and interacting with your systems, enabling us to uncover unknown vulnerabilities that often elude traditional approaches. Snapsec's thorough testing ensures comprehensive protection for your organization.

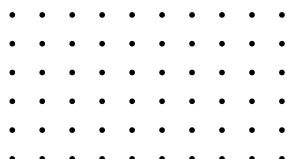

# A BRIEF HISTORY

■ Client Growth

■ Employee Growth

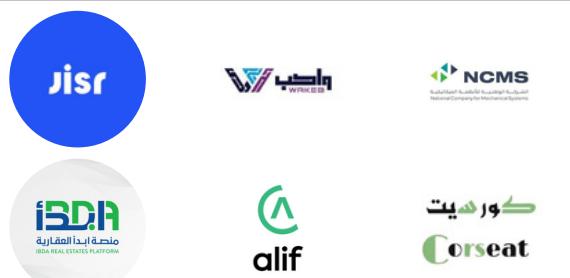

Snapsec is a rapidly growing cybersecurity company with a team of **20+ professionals** and a client base of over **80+ companies** worldwide. We are committed to providing our clients with the highest quality cybersecurity services and solutions, and helping our employees grow and develop.

# TESTIMONIALS

“Snapsec delivers top-notch pentesting services with a streamlined and in-depth approach of finding vulnerabilities. Their quality of work in uncovering all classes of vulnerabilities is exceptional. A true cybersecurity partner!”

5/5

**ZAID BIN ASHRAF**

SENIOR MANAGER - APPLICATION SECURITY

“Snapsec delivered outstanding services. Their professional support throughout the assessment was exemplary, and their communication during the test was flawless, any critical vulnerability was reported and fixed immediately. Highly recommended for top-notch cybersecurity expertise.”

5/5

**ALI AL WASHALI**

CYBER SECURITY CONSULTANT

“Snapsec's security research and bug discovery go beyond the OWASP top 10. They conduct in-depth examinations of the app's documentation and business logic, identifying and reporting issues that extend beyond the surface level, delving into the core of the application.”

5/5

**MORGAN MAXWELL**

CYBER SECURITY CONSULTANT | HIBOB

“I found the service to be professional and efficient. The testing was conducted in a thorough manner and provided useful insights into our security vulnerabilities.”

# CASE STUDIES

REAL-WORLD CASE STUDIES SHOWCASING OUR CYBER SECURITY SOLUTIONS IN ACTION.

## FINDING MULTIPLE SECURITY ISSUES ON AGORAPULSE

[FULL ARTICLE](#)

During a security audit of Agorapulse, Snapsec uncovered multiple vulnerabilities in their Cloud APPs and Infrastructure, including a critical RCE via Log4shell exploit. This audacious endeavor illuminated severe security issues within Agorapulse's infrastructure, emphasizing Snapsec's prowess in identifying and addressing complex security threats.

## WE HACKED LARKSUITE AND HERE IS WHAT WE FOUND

[FULL ARTICLE](#)

Snapsec conducted a comprehensive security audit of Larksuite, uncovering a range of vulnerabilities. These included issues like accessing other users' folders, stealing app credentials through XSS, and unauthorized access to admin logs. This audit demonstrated the need for robust security measures and proactive testing.

## HACKING ZENDESK - CACHE DECEPTION, PRIVILEGE ESCALATION AND MORE

[FULL ARTICLE](#)

Snapsec conducted a security audit of Zendesk, identifying several vulnerabilities, including CSRF (Cross-Site Request Forgery) flaws, privilege escalation issues, and other security weaknesses. Their assessment revealed a range of potential risks within the Zendesk platform.

# PRACTICAL FACTS

## RAPID GROWTH

Since its establishment in 2019, Snapsec has experienced remarkable growth, quickly becoming a trusted cybersecurity partner for over 70 organizations worldwide. This rapid expansion showcases the company's effectiveness in addressing the cybersecurity needs of businesses in a constantly evolving digital landscape.

## RECOGNIZED INDUSTRY EXPERTISE

Snapsec's commitment to security is evident through its discovery and remediation of over 2,000 vulnerabilities across various digital assets, including web applications, APIs, networks, and Android apps. This extensive track record underscores the company's dedication to enhancing its clients' overall security posture.

## DIVERSE CLIENT PORTFOLIO

Snapsec has a diverse portfolio of clients, ranging from industry leaders to startups. This diversity showcases the company's ability to tailor its cybersecurity solutions to meet the unique needs of various businesses across different sectors, from technology giants to emerging enterprises.

## GLOBAL REACH

Snapsec's impact extends globally. With clients on multiple continents, the company's reach underscores its ability to provide cybersecurity solutions and services to organizations across the world, contributing to a safer digital environment on a global scale.
